About me

I studied mathematics and physics in high school and graduated. I studied computer systems architecture for five semesters, but due to some problems, I had to drop out. However, after dropping out, due to my great interest in programming, apart from university teachings, I started programming seriously with great effort and perseverance, and I am currently looking for experience. I am eager to work with your team and I am sure that with my abilities and the experience I have gained with your team, I can meet the needs of your team.
